

CHANDAN PRAKASH

EDUCATION

SKP Engineering College

B.Tech. Information Technology

2020 - 2024

CGPA: 8.07/10.0

EXPERIENCE

Ideasion Technology Solutions

November. 2024 - January. 2025

Digital Transformation Intern

As a Digital Transformation Intern, I worked as a Python Developer and Software Tester, delivering comprehensive solutions using Flask for web development and performing API testing using Postman. I leveraged Git for version control and implemented automation testing using Selenium with Python. I collaborated with teams to implement innovative digital strategies, enhancing system performance and user experience.

PROJECTS

Automated Functional Testing of Appointment Booking System

| *Python, Chrome WebDriver*, |

This project involves the development of an automated testing framework for verifying the functionality of an online appointment booking system. Using Selenium WebDriver, the project automates end-to-end testing of key features, including user login, form submission, and appointment booking.

Mental Health AI chatbot |Python,Flask|

January. 2024

Team Leader

AI chatbots can be described as software that can chat with people using artificial intelligence. These software programs are used to perform tasks such as quickly responding to users and employing cognitive therapy and positive psychology techniques to help users manage their mental health.

ATM System |Python,Mysql|

November. 2023

Team Leader

The ATM System in Python is a software project designed to simulate the functionalities of an automated teller machine (ATM). This project aims to provide a user-friendly interface for customers to perform various banking transactions, such as withdrawing cash, depositing funds, checking balances, and transferring money between accounts.
